1	Questions	2
---	-----------	---

1 Questions

1. What?

Well, I assume that you meant to ask "what is your favorite species of the marine biological ecosystem?" Obviously, the Galapagos's sea iguana is the most superior marine creature. I believe that response should speak for itself.

2. Why?

Okay, well if you are so inclined to know why the Sea Iguana is the best marine creature, just check out the national geographic documentary on them. They look like dinosaurs and they swim like sharks. Do you really need any more of an explanation?
